For some real world examples of my coding background and language proficiencies I would suggest taking a look at my "graphic portfolio / resume / CV" repository.

Here is a quick 10,000 foot view of my language proficiencies

WORK HISTORY

Project Phoenix / Devii

Jan 2021 - Nov 2022

Senior Developer

Was brought on very early in the development process with the purpose of building out the initial ReactJS UI and linking up the GraphQL database. Worked with other team members to develop a Figma based style guide and workflow from mock-up to implementation

Myriad Mobile / Bushel.ag

Sept 2016 - Oct 2020

Full Stack Web Developer

Built and maintained company Wordpress sites. Worked in small teams to design and build both public and private customer web apps. Performed various full stack jobs, working with both front and back end libraries, including ReactJS, AngularJS, PHP 7, Docker, Vagrant, Ruby, Bulma, and a few others.

Realtruck.com

Oct 2014 - Jan 2016

Front End / Mobile Developer

Revamped both the mobile and desktop websites. Completed a team wide push to modernize the legacy code base. Tasks also included adding new functionality and designs, with a focus on updating build tools and asset pipelines to reduces page load times and increase security.

freshLime Startup

Sept 2013 - Aug 2016

Front End / iOS Developer

Starting with basic concept art, built out and programmed a complex web revolving around in-home service industry professionals. Published an iOS mobile app using AngularJS and Cordova. Integrated multiple payment providers on web and iOS platforms.

EDUCATION

University of North Dakota

Bachelor of Science | Psychology

Studied a number of industrial and organizational psychology topics. With a strong focus in operant conditioning, behavioral designs, and color theory. Assisted in conducting focus groups and studies based around perception and learning patterns.

University of North Dakota

Bachelor of Science | Economics

Focused on macroeconomic principals, consumer buying patterns, and mathematical game theory. Applied formulas to create complex mathematical models which attempted to predict future buying habits.
