#### CLOUD SERVER ADMIN

#### CSS / SCSS / STYLUS

## WORK HISTORY

### Full Stack Web Developer @ Myriad Mobile

Sept 2016 - Oct 2018

Built and maintained company Wordpress sites. Worked in small teams to design and build both public and private customer web apps. Performed various full stack jobs, working with both front and back end libraries, including ReactJS, AngularJS, PHP 7, Docker, Vagrant, Ruby, Bulma, and a few others.

### Front End / Mobile Developer @ RealTruck

Oct 2014 - Jan 2016

Revamped both the mobile and desktop websites. Completed a team wide push to modernize the legacy codebase. Tasks also included adding new functionality and designs, with a focus on updating build tools and asset pipelines to reduce page load times and increase security.

### Front End / iOS Developer @ freshLime

September 2013 - August 2016

Starting with basic concept art, built out and programmed a complex web revolving around in-home service industry professionals. Published an iOS mobile app using AngularJS and Cordova. Integrated multiple payment providers on web and mobile platforms.

## EDUCATION

### University of North Dakota

#### Bachelor of Science in Psychology

Studied a number of industrial and organizational psychology topics. With a strong focus in operant conditioning, behavioral designs, and color theory. Assisted in conducting focus groups and studies based around perception and learning patterns.

### University of North Dakota

#### Bachelor of Arts in Economics

Focused on macroeconomic principals, consumer buying patterns, and mathematical game theory. Applied formulas to create complex mathematical models which attempted to predict future buying habits.

## SOURCE CODE

### Conjure

[github.com/hument/conjure](https://github.com/hument/conjure)

Wordpress Conjure is a modified version of Sage 9 that has been updated to include real world addons and improvements you will use in your everyday development.

### WebCraft

[github.com/hument/webcraft](https://github.com/hument/webcraft)

Build out complex static HTML based projects with this Middleman ver 4+ starter kit. It features a webpack asset pipeline, markdown parsing, support for ES6+ Javascript, virtually any CSS libraries, as well as SASS / SCSS support.

### Mage

[github.com/hument/mage](https://github.com/hument/mage)

A set of CLI based tools. Including bash scripts, CLI apps, and terminal shortcuts that allow for ease of development and every day administration tasks.
